Art Unit:

Claim Rejection under 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5,12,14,22,119 are rejected under 35 U.S.C. 102(b) as being anticipated by ES 2100821; 6/16/97. ES '821 teaches a composition comprising 88.92 % water, 10% self-emulsifiable oil/water base (emulsifying agent), 0.01% or 100 ppm cinnamon oil (contains cinnamic aldehyde), and 0.01 % of dill (carrot vegetable oil). It is inherent that the composition would exist as an oil-in-water emulsion.

Claim Rejection under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5,14,22 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 01040056; 2/10/89. JP '056 teaches a deodorant comprising essential oils selected from limonene, pinene, and cineole plus an emulsifying agent (anionic or nonionic surfactant). JP '056 teaches

Art Unit:

that the oils are dispersed in water. JP '056 teaches all that is recited in the claims except for the composition comprising the instant ppm concentration range of essential oil. It would have been obvious at the time the invention was made to determine the optimum amount of essential oil. One would have been motivated to do this in order to develop the most effective deodorant composition.

Claim Objection / Allowable Subject Matter

Claims 6-8,112 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the emulsion comprising carvacrol, cymene, or anethole. Claims 20,24-39,42,44-48,50,70-76,78-86,89-91,93,96-99,114, and 117 are allowable the prior art does not teach the instant emulsion comprising paraffin.
